

AMENDMENTS TO THE CLAIMS:

This listing of claims will replace all prior versions, and listings, of claims in the application:

LISTING OF THE CLAIMS:

Claim 1 (currently amended): An isolated microorganism which extracellularly secretes an unsaturated fatty acid-containing lipid as lipid vesicles encapsulating said lipid, wherein said microorganism is *Mortierella alpina* SAM 2241 or *Mortierella ~~alpina~~ alpina* SAM 2242.

Claim 2 (currently amended): The microorganism ~~according to~~ of claim 1, wherein said unsaturated fatty acids are fatty acids having 18 carbons or more and two or more double bonds.

Claims 3-6 (canceled).

Claim 7 (currently amended): The microorganism ~~according to~~ of claim 1, which ~~has a property of forming~~ forms lipid vesicles containing a lipid around the colonies when said ~~microorganism~~ is grown on a solid medium, and/or ~~of making~~ which makes the culture liquid cloudy when ~~said microorganism~~ is cultured in a transparent liquid culture medium.

Claim 8 (currently amended): The microorganism ~~according to~~ of claim 1, which is selected by subjecting a strain ~~microorganism having an ability to~~ which ~~accumulate~~ accumulates an unsaturated fatty acid-containing lipid in the cell to mutation, gene manipulation or cell fusion.

Claim 9 (currently amended): The microorganism ~~according to~~ of claim [1] ~~8~~ which ~~is selected by subjecting a microorganism having an ability of accumulating an unsaturated fatty acid-containing lipid in the cell to mutation, gene manipulation or cell fusion,~~ wherein said selecting further comprises

culturing the obtained strains on a solid medium to select strains ~~of which~~ having colonies ~~are~~ covered with lipid-containing lipid vesicles at the periphery, and

then selecting those strains that make the culture liquid cloudy when said ~~microorganism~~ is cultured in a transparent liquid culture medium.

Claim 10 (currently amended): The microorganism ~~according to~~ of claim 1, which can be turned into a spheroplast or a protoplast.

Claim 11 (currently amended): An isolated microorganism having a property of extracellularly secreting a lipid as lipid vesicles encapsulating said lipid, wherein said lipid contains unsaturated fatty acids, wherein said microorganism is *Mortierella ~~alpina~~ alpina* SAM 2241 or *Mortierella ~~alpine~~ alpina* SAM2442 SAM 2242.

Claim 12 (currently amended): The microorganism ~~according to~~ of claim 1, wherein said extracellularly secreted lipid is a lipid in which 50% or more is triglyceride.

Claim 13 (currently amended): The microorganism ~~according to~~ of claim 1, wherein said unsaturated fatty ~~acids are~~ acid is arachidonic acid.

Claim 14 (currently amended): The microorganism ~~according to~~ of claim 13, wherein said lipid ~~contains~~ comprises 10% or more arachidonic acid relative to the total fatty acids.

Claim 15 (withdrawn): Lipid vesicles encapsulating an unsaturated fatty acid-containing lipid.

Claim 16 (withdrawn): The lipid vesicles according to claim 15 wherein said unsaturated fatty acids are unsaturated fatty acids having 18 or more carbons and two or more double bonds.

Claim 17 (withdrawn): The lipid vesicles according to claim 15, wherein said lipid vesicles are produced by a microorganism.

Claim 18 (withdrawn): Lipid vesicles encapsulating a lipid obtained from a culture liquid prepared by culturing the microorganism according to claim 1 in a liquid medium.

Claim 19 (withdrawn): The lipid vesicles according to claim 15, which can be uniformly dispersed in water or a hydrophilic substance.

Claim 20 (withdrawn): The lipid vesicles according to claim 15, which stably retains the lipid encapsulated within said lipid vesicles against oxidation.

Claim 21 (withdrawn): The lipid vesicles according to claim 15, which can be separated by centrifugation.

Claim 22 (withdrawn): The lipid vesicles according to claim 15, wherein the membrane of said lipid vesicles comprises sugar, protein, and lipid.

Claim 23 (withdrawn): The lipid vesicles according to claim 15, which has an average diameter of 0.2 to 10 μm .

Claim 24 (withdrawn): The lipid vesicles according to claim 15, wherein the lipid encapsulated in said lipid vesicles is a lipid in which 50% or more is triglyceride.

Claim 25 (withdrawn): A lipid isolated from the lipid vesicles according to claim 15.

Claim 26 (withdrawn): A food, a cosmetic, or an animal feed comprising the lipid vesicles according to claim 15 added thereto.

Claim 27 (withdrawn): The food according to claim 26 wherein the food comprising the lipid vesicles added thereto is a functional food, a nutrient supplement, formula for premature infants, modified milk for babies, a baby food, a food for pregnant women or a food for the aged people.

Claim 28 (withdrawn): The food according to claim 26 wherein the foods to which the lipid vesicles have been added are beverages.

Claim 29 (withdrawn): A food, a cosmetic, a pharmaceutical or an animal feed comprising the lipid according to claim 25 added thereto.

Claim 30 (currently amended): A method of producing lipid vesicles, ~~which method comprises~~ comprising culturing the microorganism of claim 1 in a liquid culture medium and ~~then collecting the lipid vesicles encapsulating a lipid from the culture liquid~~ culture medium.

Claim 31 (currently amended): [A] The method of claim 30, wherein said culturing is continuous and said collecting is continuous ~~producing lipid vesicles, which method comprises continuously culturing the microorganism of claim 1 in a liquid medium and then continuously collecting the lipid vesicles encapsulating a lipid from the culture liquid.~~

Claim 32 (currently amended): A method of producing a lipid, ~~which method comprises~~ comprising culturing the microorganism of claim 1 in a liquid culture medium, collecting lipid vesicles encapsulating a lipid from the ~~culture liquid~~ culture medium, and separating a lipid containing fatty acids from said lipid vesicles.

Claim 33 (currently amended): The method of claim 32, further comprising A ~~method of producing unsaturated fatty acids, which method comprises culturing the microorganism of claim 1 in a liquid medium, collecting lipid vesicles encapsulating a lipid from the culture liquid, separating the lipid containing fatty acids from said lipid vesicles, and isolating the unsaturated fatty acids from said lipid.~~

Claim 34 (currently amended): An isolated microorganism, wherein said microorganism is *Mortierella alpina* SAM 2241 or *Mortierella* ~~alpine~~ *alpina* SAM 2242 having a property of extracellularly secreting a lipid as lipid vesicles encapsulating said lipid, wherein said lipid ~~contains~~ comprises unsaturated fatty acids that have 18 carbons and three or more double bonds or 20 or more carbons and two or more double bonds.

Claims 35-36 (canceled).

Claim 37 (currently amended): The microorganism of claim 34, which ~~has a property of forming~~ forms lipid-containing lipid vesicles around the colonies thereof when ~~said microorganism is~~ grown on a solid medium, and/or ~~of making~~ which makes the ~~culture~~ liquid culture medium cloudy when ~~said microorganism is~~ cultured in a transparent liquid culture medium.

Claim 38 (currently amended): The microorganism of claim 34, obtained by subjecting [a] the microorganism ~~which has an ability of intracellularly accumulating a lipid containing fatty acids that have 18 carbons and three or more double bonds or 20 or more carbons and two or more double bonds,~~ to mutation, gene manipulation or cell fusion.

Claim 39 (currently amended): The microorganism ~~according to~~ of claim [34] 38, further obtained by ~~subjecting a microorganism which has an ability of intracellularly accumulating a lipid containing fatty acids that have 18 carbons and three or more double bonds or 20 or more carbons and two or more double bonds, to mutation, gene manipulation or cell fusion, and~~

selecting, from the strains obtained, strains that make the ~~culture~~ liquid culture medium cloudy and ~~then separates form~~ a lipid layer on the surface of the liquid culture medium ~~when cultured in a transparent liquid medium.~~

Claim 40 (currently amended): The microorganism ~~according to~~ of claim 34, which can be turned into a spheroplast or a protoplast.

Claim 41 (currently amended): The microorganism ~~according to~~ of claim 34, wherein said extracellularly secreted lipid is a lipid in which 50% or more is triglyceride.

Claim 42 (currently amended): A method of producing a lipid ~~containing~~ comprising unsaturated fatty acids, which method comprises culturing the microorganism of claim 34 in a liquid culture medium and collecting the lipid from the ~~culture~~ liquid culture medium.

Claim 43 (currently amended): ~~The [A] method of claim 42, producing a lipid containing unsaturated fatty acids, which method comprises continuously culturing the microorganism of claim 34 in a liquid medium and then continuously collecting the lipid from the culture liquid wherein said culturing is continuous and said collecting is continuous.~~

Claim 44 (canceled).

Claim 45 (withdrawn): The screening method according to claim 74 wherein said unsaturated fatty acids have 18 carbons and three or more double bonds or 20 or more carbons and two or more double bonds.

Claim 46 (withdrawn): The screening method according to claim 74 wherein said microorganism is a filamentous fungus.

Claim 47 (withdrawn): A screening method wherein strains having a property of extracellularly secreting an unsaturated fatty acid-containing lipid are selected by subjecting a microorganism having an ability to accumulate the unsaturated fatty acid-containing lipid in the cell to mutation, gene manipulation or cell fusion, and

culturing the strains obtained on a solid medium to determine strains of which colonies are covered with lipid-containing lipid vesicles at the periphery.

Claim 48 (withdrawn): A screening method wherein strains having a property of extracellularly secreting an unsaturated fatty acid-containing lipid are selected by

subjecting a microorganism having an ability to accumulate the unsaturated fatty acid-containing lipid in the cell to mutation, gene manipulation or cell fusion,

culturing the strains obtained on a solid medium to select strains of which colonies are covered with lipid-containing lipid vesicles at the periphery, and

further culturing the selected strains in a transparent liquid medium to determine strains for which the culture liquid becomes cloudy.

Claim 49 (withdrawn): The screening method according to claim 47, wherein said microorganism is subject to mutation treatment with N-methyl-N-nitro-N-nitrosoguanidine (NTG).

Claim 50 (canceled).

Claim 51 (withdrawn): A microorganism selected by the screening method according to claim 74.

Claim 52 (currently amended): The ~~microorganism according to~~ microorganism of claim 34, wherein said unsaturated fatty acid is selected from the group consisting of γ -linolenic acid, arachidonic acid, 4, 7, 10, 13, 16, 19-docosahexaenoic acid (DHA) and ω 9 highly unsaturated fatty acids.

Claim 53 (canceled).

Claim 54 (currently amended): The microorganism ~~according to~~ of claim [1] 34, wherein at least one ~~of a~~ reaction in the microorganism selected from the group consisting of a Δ 5 desaturation reaction, a Δ 6 desaturation reaction, a Δ 9 desaturation reaction, a Δ 12 desaturation reaction, a ω 3 desaturation reaction and a chain elongation reaction is enhanced, or reduced or missing.

Claims 55-56 (canceled).

Claim 57 (currently amended): The microorganism ~~according to~~ of claim 8, ~~which is selected by subjecting a microorganism having an ability of accumulating an unsaturated fatty acid-containing lipid in the cell to mutation, gene manipulation or cell fusion, wherein~~ said selecting further comprises

culturing the obtained strains on a solid medium to select strains ~~of which~~ having colonies ~~are~~ covered with lipid-containing lipid vesicles at the periphery, and then selecting those strains that make the culture liquid cloudy when said ~~microorganism~~ strain is cultured in a transparent liquid culture medium.

Claim 58 (currently amended): The microorganism ~~according to~~ of claim 2, wherein said unsaturated ~~fatty acids are~~ fatty acid is arachidonic acid.

Claim 59 (withdrawn): The lipid vesicles according to claim 15 wherein said unsaturated fatty acids are unsaturated fatty acids that have 18 carbons and three or more double bonds or 20 or more carbons and two or more double bonds.

Claim 60 (withdrawn): Lipid vesicles encapsulating a lipid obtained from a culture liquid prepared by culturing the microorganism according to claim 55 in a liquid medium.

Claim 61 (withdrawn): The lipid vesicles according to claim 60, wherein the lipid encapsulated in said lipid vesicles is a lipid in which 50% or more is triglyceride.

Claim 62 (withdrawn): A lipid isolated from the lipid vesicles according to claim 62.

Claim 63 (withdrawn): A food, a cosmetic, or an animal feed comprising the lipid vesicles according to claim 61 added thereto.

Claim 64 (withdrawn): A food, a cosmetic, a pharmaceutical or an animal feed comprising the lipid according to claim 62 added thereto.

Claims 65-66 (canceled).

Claim 67 (currently amended): A method of producing a lipid, ~~which method comprises~~ comprising culturing the microorganism ~~according to~~ of claim 34 in a liquid culture medium, collecting lipid vesicles encapsulating a lipid from the ~~culture~~ liquid culture medium, and separating a lipid containing fatty acids from said lipid vesicles.

Claim 68 (currently amended): A method of producing unsaturated fatty acids, ~~which method comprises~~ comprising culturing the microorganism ~~according to~~ of claim 34 in a liquid culture medium, collecting lipid vesicles encapsulating a lipid from the ~~culture~~ liquid

culture medium, separating the lipid containing fatty acids from said lipid vesicles, and isolating the unsaturated fatty acids from said lipid.

Claims 69-73 (canceled).

Claim 74 (withdrawn): A screening method for determining whether a microorganism has an ability of extracellularly secreting a lipid containing unsaturated fatty acids comprising

culturing a microorganism in a transparent liquid medium, and
determining whether the culture liquid becomes cloudy.

Claim 75 (withdrawn): A screening method according to claim 74, wherein the microorganism is selected from genus *Mortierella*.

Claim 76 (withdrawn): A screening method wherein strains having a property of extracellularly secreting an unsaturated fatty acid-containing lipid are selected by subjecting a microorganism having an ability to accumulate the unsaturated fatty acid-containing lipid in the cell to mutation, gene manipulation or cell fusion, and

culturing the strains obtained on a solid medium to select strains of which colonies are covered with lipid-containing lipid vesicles at the periphery.

Claim 77 (withdrawn): The screening method according to claim 48, wherein said microorganism is subject to mutation treatment with N-methyl-N-nitro-N-nitrosoguanidine (NTG).

Claim 78 (canceled).

Claim 79 (withdrawn): A microorganism selected by the screening method according to claim 47.

Claim 80 (withdrawn): A microorganism selected by the screening method according to claim 48.
